Introduction to EDEN

Mission Statement

Utilities Protection Center will be an industry leader in preventing damage to members' facilities and in promoting safety through high quality, efficient and economical notification service; providing education; and encouraging compliance with all applicable laws.

Background

The Utilities Protection Center was formed as a result of a digging incident that occurred in the late 1960's. A contractor was digging near a day care center in the city of Hapeville and snagged a natural gas line. The explosion that followed injured and/or killed some children attending this facility. As a result, a law was passed requiring excavators to call before digging, but there were many exceptions.

In 1974, Atlanta Gas Light, Georgia Power and Bellsouth formed the Utilities Protection Center. It began by serving only the metropolitan Atlanta area. Pipeline companies in the Atlanta area—Plantation, Colonial, and Transcontinental—later became members of the service.

UPC is a not for profit organization funded by our member utilities. The Utilities Protection Center is a communication system established to provide one telephone number for the contractors and the general public to call for notification of their intent to use equipment for excavation, tunneling, grading, demolition, or any similar work. This one call system provides the participating members an opportunity to identify and locate their underground utilities.

Along with the Call Center, UPC also has web users creating their own locate requests following the UPC guidelines.

Purpose

The purpose of this manual is to educate web users on how to use the EDEN (Excavator Digging Event Notification) web entry system. It will give web users detailed instructions on how to enter, view, and check the status and/or update locate requests. It also serves as an instructional tool for utility members to view and respond to locate requests online using the Positive Response Information System in EDEN.

Login to EDEN

1. Go to the EDEN login homepage at <http://eden.gaupc.com>.
2. Or, from the UPC web page www.gaupc.com, click on **EDEN Login** located at the top right-hand corner of the site. This will then take you to the EDEN login homepage.

If you need assistance, you may contact the EDEN System Helpdesk at (770) 476-6055 or email the Helpdesk at EDENhelpdesk@gaupc.com.

Welcome to the EDEN (Excavator Digging Event Notification) system.

Please login to create or manage Locate Request Notices.

Change Password

In order to change your password, you will need to provide your current password, as well as your new password and a confirmation of your new password.

Current Password:

New Password:

Confirm Password:

 [Change Password](#)

- The next screen will appear where you will be required to change your **Password**. You will receive an email confirmation with your **User Name** and your **New Password**.
- Click the **Change Password** button.

Please read and accept the following disclaimer in order to proceed:
UPC notifies its members of proposed excavation and other activities around their facilities. UPC does not notify non-members of these activities.

UPC does not verify the accuracy of information generated by or received from third parties. Furthermore, UPC does not undertake to guarantee that information that is improperly entered or improperly transmitted will be received or properly understood by its members. Each party inputting a web ticket assumes total responsibility and liability for its input and any other subsequent use of this application methodology that relies upon such input.

Should a third party generate a web ticket entry, it should be deemed pending until official confirmation is received from UPC. Official confirmation consists of a serial number and a list of members receiving notification.

- A disclaimer will appear, after initial login and before you create or change a locate request. Please read this carefully then click **I Agree**. This disclaimer reminds you that UPC will not notify non-members and is not responsible for the information provided.

NOTE: The allotted locate requests created through EDEN are Normal, Restake, Additional Request and Design notices. All Emergency, Damage and Insufficient (Rush) notices must be called into the Call Center by dialing 811 or (800) 282-7411 or (770) 623-4344.

Login to EDEN Cont.

Helpful Hints while Navigating through EDEN

- **[?]**: Help boxes. On the **Locate Request Creation** screen, you will notice a [?] after each field. By placing your mouse pointer over the icon a suggestion box will appear that will provide a brief description of the field and what should be placed in it.
-  If a screen in EDEN has this printer icon at the bottom right hand corner, then you may select the icon to print the page. A new window will pop up with the screen you want to print. Right click on your mouse anywhere in the new window. Select **Print**.
- The scroll feature on your mouse will zoom you in and out of the map as opposed to page up and page down.
- **IMPORTANT:** Make sure you use the TAB key or your mouse to move from field to field throughout the **Locate Request Creation** screen.
- Make sure the Pop-up Blocker is turned off or you will not be able to see the ticket number upon completion of the locate request.

Top Panel Review

▸ [Locate Request Panel](#) [Locate Request Manager](#) [Positive Response Manager](#) [PRIS Viewer - CHECK POSITIVE RESPONSE](#)

Locate Request Panel:

- Create a new locate request.
- Provides a list of the daily locate requests you have created.

Locate Request Manager:

- Depending on your profile access, it allows you to search for locate requests that you have created, that your company has created and that are assigned to your service area.
- Depending on your profile access, you can search to copy, cancel, restake, additional request, view request, print and view child locate requests.

Positive Response Manager:

- Allows the UPC member utility to respond to each individual locate request providing information on whether underground facilities are present or not present.
- Allows the member excavator to check the responses to their locate requests.

Positive Response Viewer:

- Allows you to check the status of a locate request by ticket number.
- May be accessed while logged in or out of EDEN.

Search:

- Directs you to **Locate Request Manager**.
- May search by partial or whole ticket number.

Locate Request Panel

The **Locate Request Panel** allows you to create new locate requests and provides a list of daily locate requests you have created.

What is the scope of your locate request?

Choose one of the following by selecting the appropriate radio button:

- **Standard:** A locate request for a specific address, lot number, range of consecutive lot numbers or consecutive range of street addresses.
- **Intersection:** A locate request for a specific intersection. An intersection locate request begins at the center point of the requested intersection and will be located a maximum of 200 feet in all directions in the right of way. Specify the footage needed for your locate request not to exceed 200 feet in all directions starting from the center point of the intersection.
- **Intersection to Intersection:** A locate request along a specific road from one intersection to another intersection. This locate request will be for the right of way only and cannot exceed one mile or cross into another county. It may be for both sides of the requested road.

NOTE: Each radio button you choose will alter the locate request screen in a different way to conform to the specific locate request.

Dig Site County: The county the digging will take place in. As you are entering the county in this field, you will notice the drop down list changing as you type each letter. If you tab to the next field and a county is highlighted in the drop down list, the county highlighted will be selected. EDEN will NOT allow you to input a city unless you enter the county first.

Dig Site City: The city of the location. As you are entering the city in this field, you will notice the drop down list changing as you type each letter. If you tab to the next field and a city is highlighted in the drop down list, the city highlighted will be selected. Once you type in a city the drop down list will require you to choose "In" or "Out" of the city limits. "In" means the dig site falls within the city limits and "Out" means the dig site falls outside the city limits.

Enter Locate Request Information Cont.

[View Dig Site Map](#)

View Dig Site Map: Allows you to view the map before the locate request form is completed but only after the county and the city have been chosen. It is best to complete the **Digsite Address** field before using this feature for the map to better assist you in finding the location.

<input type="text"/>	<input type="text"/>	<input type="checkbox"/>	<input type="text"/>	<input type="text"/>

Street Address Numbers:

Choose one of the following by selecting the appropriate radio button:

- **Normal:** A locate request with a single street address.
- **Lot #'s:** A locate request for a dig site with a lot number. If you have a single lot number, then enter it in the left **Lot #** field found in the next **Digsite Address** section. If you have up to five consecutive lot numbers, then enter the lowest number in the left **Lot #** field and the highest in the right **Lot #** field. If you have up to five **nonconsecutive** lot numbers, then leave both the **Lot #** fields blank and enter all of the lot numbers in the **Locate Instructions** field. Make sure that these five nonconsecutive lot numbers do not exceed a combined distance of one mile and are along one road.
- **Address Range:** A locate request with an address range up to five consecutive addresses. Enter the street address range in the next **Digsite Address** section, starting with the lowest number in the **From** field and the highest in the **To** field. If you have up to five addresses that are **nonconsecutive**, leave the **From** and **To** fields blank and enter all of the addresses in the **Locate Instructions** field. Make sure that these five nonconsecutive addresses do not exceed a combined distance of one mile and are along one road.

NOTE: Each radio button you choose will alter the locate request screen in a different way to conform to the specific locate request.

Enter Locate Request Information Cont.

Street #	Prefix	Street Name	APS	Street Type	Suffix
Digsite Address: [?]	[?] [?]	[?] [?]	[?] <input type="checkbox"/>	[?] [?]	[?] [?]
Prefix	Street Name	APS	Street Type	Suffix	
Nearest Cross Street: [?]	[?] [?]	[?] <input type="checkbox"/>	[?] [?]	[?] [?]	[?] [?]
Subdivision/Community: [?]					

Dig Site Address: After entering the house, building or lot number, proceed to the next field.

- **Prefix:** Enter the directional prefix such as “S” or “South” Summit Ridge Parkway.
- **Street Name:** Enter the street name without any prefix, street type or suffix. If you are using South “Summit Ridge” Parkway, you would type in “Summit Ridge” as the street name. A drop down list will appear with a list of streets as you type each letter of the street name. Sometimes changing the city from inside to outside or vice versa will enable you to find the street in EDEN. If you are unable to find the street name in the drop down list, use the **APS** feature described in the next section.

NOTE: You must select the dig site street from the drop down list provided in order for EDEN to find the dig site for you. If you type in the street name without selecting it from the drop down list, you will be required to manually map your dig site. A selection can be made by either using the mouse pointer or using the up/down arrow keys and pressing the ENTER key when the desired street is highlighted.

- **APS:** Adjacent Places Search. Check this option to search for your street in surrounding counties or cities. After typing in the street name use the mouse or use the TAB key to check the **APS** box. Press F9 on your keyboard to activate the search. A drop down list of streets in neighboring counties and cities will appear. The list is in alphabetical order by counties and within counties it is in alphabetical order by cities and then by street name. Highlight the correct dig site street name.

NOTE: If the dig site street is not in the drop down list, then it is not in the database. You must complete all applicable *Dig Site Address* fields and manually map your dig site. Detailed instructions for *Manually Mapping Locate Requests* are found on Page 26 of this manual.

- **Street Type:** If the example was South Summit Ridge Parkway, then you would place “Pkw” in this field. Use abbreviations when entering street types. Choose from the drop down list and/or type your own.
- **Suffix:** Enter the directional suffix such as “S” for Summit Ridge Parkway “South”.

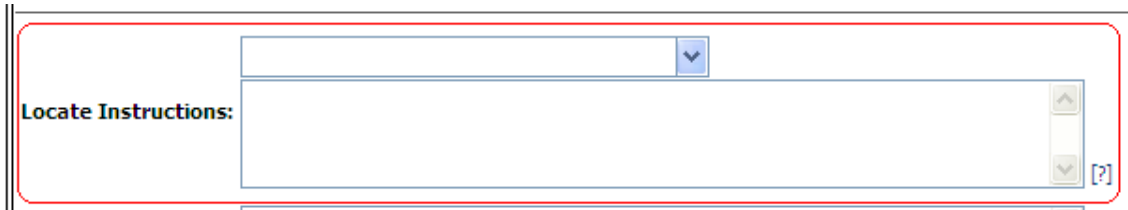

Nearest Cross Street: This is the closest intersecting road to the dig site. Enter the prefix, street type, and suffix as previously described. The **APS** feature may also be used to search for the nearest cross street. When selecting the nearest cross street from the drop down list, follow the same procedure as selecting the **Dig Site Address Street Name**.

Subdivision/Community: Enter the name of the subdivision or community here if applicable.

Enter Locate Request Information Cont.

[View Dig Site Map](#)

View Dig Site Map: Click icon next to the **Dig Site City** field to view map.

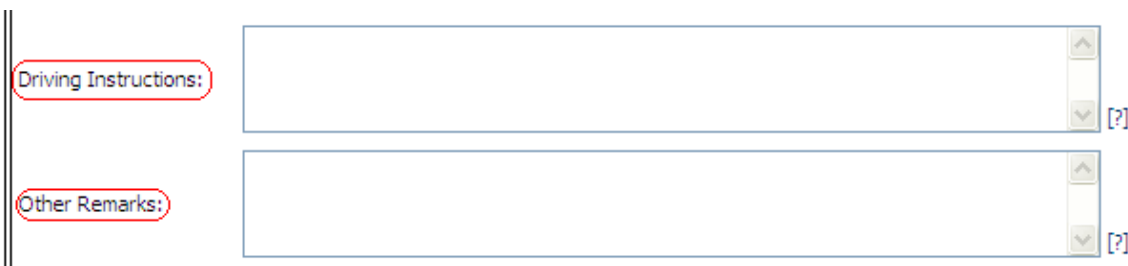

The screenshot shows a form field labeled "Locate Instructions:". To the left of the text box is a dropdown menu with a downward arrow. The text box has a small "[?]" icon at the bottom right corner.

Locate Instructions: Type your locate instructions in the text box provided. You may also select a pre-defined work area from the drop down list located above this field. Please be clear and concise when providing your locate instructions.

Be aware of the following:

- No more than five addresses, buildings or lots are allowed per locate request. They do not have to be consecutive addresses but must be a combined distance of no more than one mile.
- A single locate request may not be longer than one mile and no more than a single street.
- An intersection locate request will be located a maximum of 200 feet in all directions in the right of way. Specify the footage needed for your locate request not to exceed 200 feet in all directions starting from the center point of the intersection.
- A single locate request cannot include an entire subdivision, apartment complex, mobile home park, etc.
- You cannot cross county lines on a single locate request.

NOTE: See "**Ticket Size Policy**" for full details at www.gaupc.com/laws_ticket_size.asp.

The screenshot shows two form fields. The top field is labeled "Driving Instructions:" and the bottom field is labeled "Other Remarks:". Both fields have a dropdown menu to their left and a "[?]" icon at the bottom right corner.

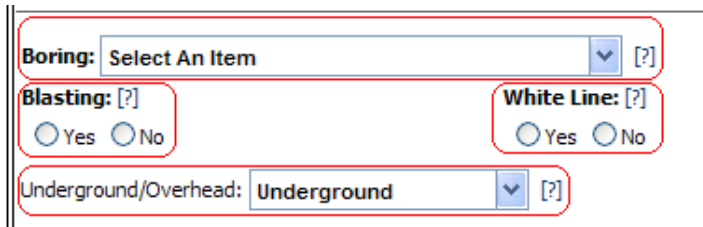

Driving Instructions: You must provide enough information to determine where the excavation is taking place. In new developments this may include driving directions.

NOTE: You must enter driving directions when your dig site is on a street that is not located in the UPC map database.

Other Remarks: This box is provided for any additional information that may need to be given to the locate technician. (Example: Arrange an on-site meeting, street alias information, business name, etc.)

Enter Locate Request Information Cont.

Work Information Questions

Boring: If your excavation will involve horizontal directional drilling (i.e. boring), select one of the pre-defined options. If the pre-defined options do not have what you will be drilling under, then type it in the **Other Remarks** section of the request.

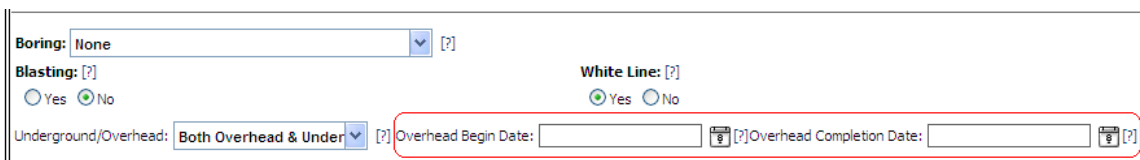

Blasting: If your excavation will involve blasting with dynamite or any other explosives, select **Yes**. If not, select **No**.

White Line: If you will be marking the area with white paint and/or white flags, select **Yes**. If not, select **No**. If you will be marking the area with anything other than white paint or white flags, specify that in the **Other Remarks** section.

Underground/Overhead: This is concerning the High Voltage Safety Act. “The purpose of this act is to prevent injury to persons and property and interruptions of utility service resulting from accidental or inadvertent contact with high-voltage electric lines by providing that no work shall be done in the vicinity of such lines unless and until the owner or operator thereof has been notified of such work and has taken one of the safety measures” approved by law (Code 1981, Section 46-3-30, Enacted by Ga. L. 1992, p. 2141, Section 1).

Please select one of the following options:

- **Underground:** Excavation Only—Excavation will take place and persons and/or equipment will not be within 10 feet of any overhead high voltage power lines.
- **Both Overhead and Underground:** Excavation and Overhead—Excavation will take place and persons and/or equipment will be within 10 feet of overhead high voltage power lines.
- **Overhead:** Overhead with No Excavation—No excavation will take place but persons and/or equipment will be within 10 feet of overhead high voltage power lines. (Example: Tree trimming.)

If **Both Overhead & Underground** or **Overhead** is selected, choose your **Overhead Begin Date** and **Overhead Completion Date** by opening the calendar pop-ups and selecting the appropriate dates. The **Overhead Begin Date** cannot be before the **Legal Date** described in the next section.

Enter Locate Request Information Cont.

Important Dates

Boring: <input type="text" value="Select An Item"/> [?]		
Blasting: [?]	White Line: [?]	
<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Yes <input type="radio"/> No	
Underground/Overhead: <input type="text" value="Underground"/> [?]		
Legal Date:	Restake Date	Expiration Date
<input type="text" value="8/12/2008 7:00:00 AM"/> [?]	<input type="text" value="08/25/2008"/> [?]	<input type="text" value="08/28/2008"/> [?]
Response Due Date		
<input type="text" value="8/11/2008 11:59:59 PM"/> [?]		
<input type="button" value="Verify Dig Site Map"/> [?]		

Legal Date: The date when the ticket becomes effective. You may check the status of your locate request through the Positive Response Information System (PRIS).

Response Due Date: The date when each utility member notified must respond to your locate request through the Positive Response Information System (PRIS), providing the status of your locate request.

Restake Date: The date when your locate request must be updated or renewed to continue excavation past the expiration date. Please be sure to restake your locate request before 4:30 pm on the restake date or two business days prior to that date. Anything entered after 4:30 pm is considered to be entered on the following business day.

Expiration Date: The date when your locate request expires. No excavation can be performed past this date without a valid locate request.

NOTE: Standard locate requests expire 21 calendar days following the date of notice. The project duration does not affect the expiration date.

Verify Dig Site Map: Select this button to verify your dig site on the map.

Submit Request: This button will appear right above the *Verify Dig Site Map* button once you return to the **Locate Request Creation** page from the map.

Dig Site Map Verification

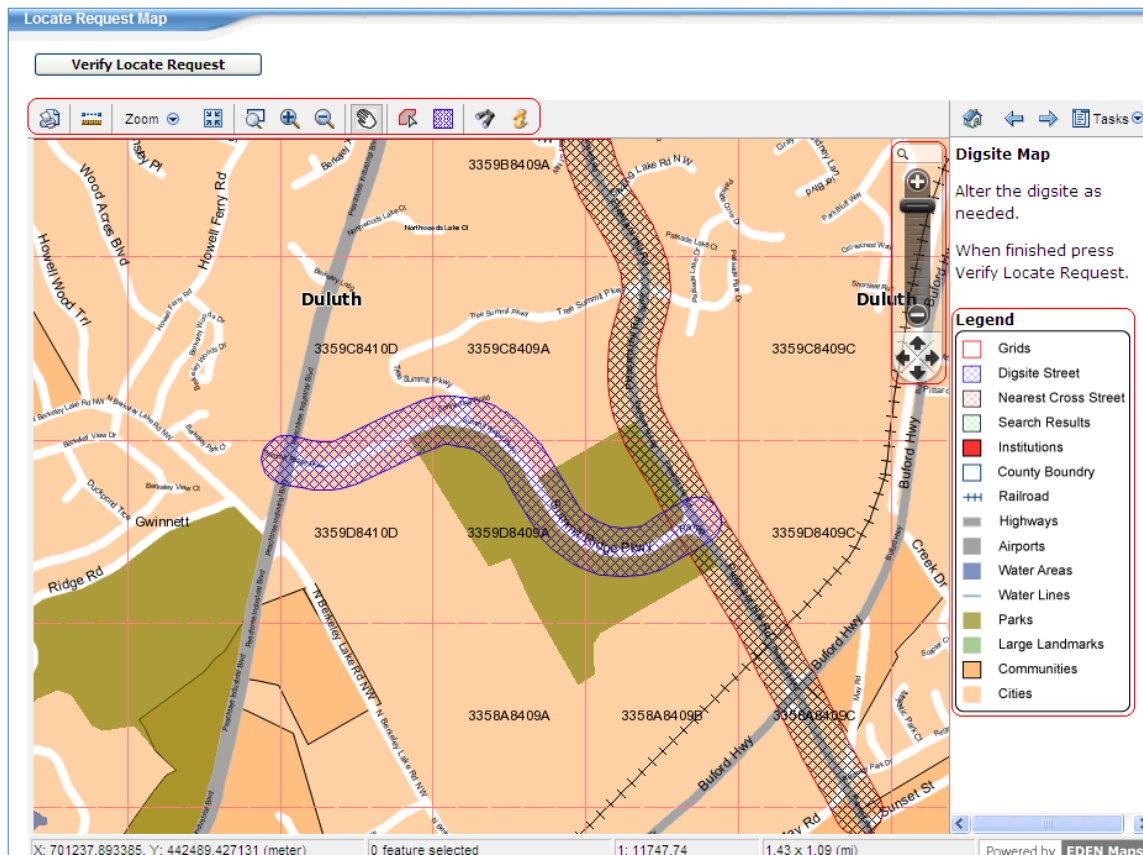

After selecting either **View Dig Site Map** or **Verify Dig Site Map** you will be directed to the map and asked to verify your dig site. The dig site will be identified by the **blue** cross hatched area and the nearest cross street will be identified by the **red** cross hatched area. The map contains red dashes in the shape of squares. These squares are known as grids and are approximately ¼ mile horizontally and 1/3 mile vertically in distance per grid. Your dig site should not extend along more than 8 grids. The grids determine which utility members will be notified on your locate request.

1. If your dig site is correct, then select the **Verify Locate Request** button located both at the top and the bottom of the map screen. It will automatically direct you to the **Locate Request and Member Utility Confirmation** page.
2. If your dig site is incorrect, then you will need to manually map your locate request. Detailed instructions on **Manually Mapping Locate Requests** are found on Page 26 of this manual.

NOTE: The dig site will be highlighted in blue and the nearest cross street will be highlighted in red.

You may press F11 on your keyboard to view the map in full window mode. This full window mode will fill the entire screen of your computer's monitor with the map. To exit out of full window mode press F11 again.

Mapping Tools

LEGEND – The map legend is found along the right side of the map.

ZOOM AND PANNING TOOL WITHIN THE MAP – A Zoom and Panning Tool is located in the upper right hand corner of the map. To zoom in, click on the bar and drag toward the plus sign. To zoom out, drag the bar toward the minus sign. To move the map, click on the arrow that matches the direction you want to move the map. You can also move the entire tool to anywhere on the map. Just click on the top of the tool and drag it to where you want it.

NOTE: The scroll feature on your mouse will zoom you in and out of the map as opposed to page up and page down.

TOOL BAR – The tool bar is found across the top of the map.

Mapping Tools Cont.

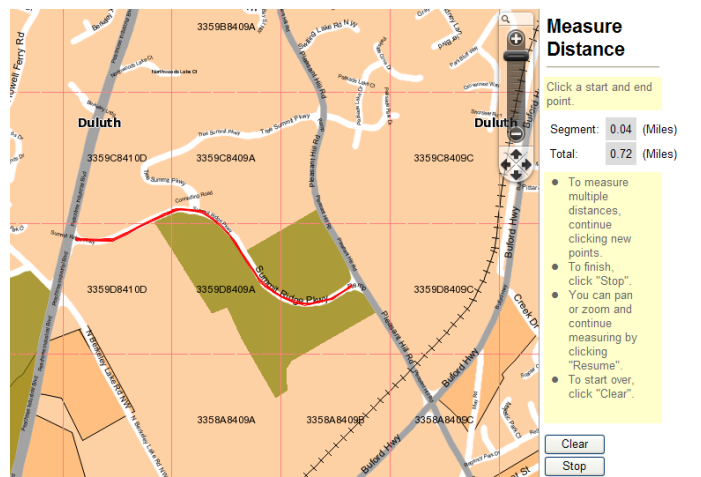

Get Printable Page

1. Select the **Get Printable Page** tool to retrieve a printable page of the map. A window appears where you can select the elements to include in the print layout.
2. Click on the **Create Page** button after making selections. A window appears and shows you what will be printed.
3. Click on the **Print** tool to print the map.

Measure

1. Select the **Measure** tool to measure a distance on the map. **Measure Distance** instructions are displayed to the right of the map.
2. Click on the map at the starting point and click again at the stopping point for the measurement. The measurement line is red and the distance is measured in miles in segments and total distance.
3. When measuring along a road, click along the road to follow the curves.

Zoom to Previous View, Next View, Initial Map View

1. Select the **Zoom** tool and a dropdown appears. From the dropdown, select **Previous View** to go back to the previous map view. Click on **Next View** to go forward to the next map view.
2. **Initial Map View** displays a state/county view.

Mapping Tools Cont.

Initial Center and Scale

1. Select the **Initial Center and Scale** tool to view the original map view that was displayed based on the dig site information on the locate request. This is helpful if you have zoomed in or out or moved the map.

Zoom to Rectangle

1. Select the **Zoom to Rectangle** tool and click and drag on a specific area on the map for a quick zoom to the maximum zoom level. The map will zoom in when the mouse key is released.

Zoom In

1. Select the **Zoom In** tool and click on a specific area on the map to zoom in for a closer view and to display street names. Each click brings the map closer until the maximum zoom level has been reached.

Zoom Out

1. Select the **Zoom Out** tool and click on a specific area on the map to zoom out for a wider view of the area. Each click moves the map farther away and displays more of the surrounding area until the minimum zoom level has been reached where the street names are not visible.

Pan Mode

1. Select the **Pan Mode** tool to move the map in any direction. Click and drag on the map in the direction you want to move it. The map will reset itself when the mouse key is released.

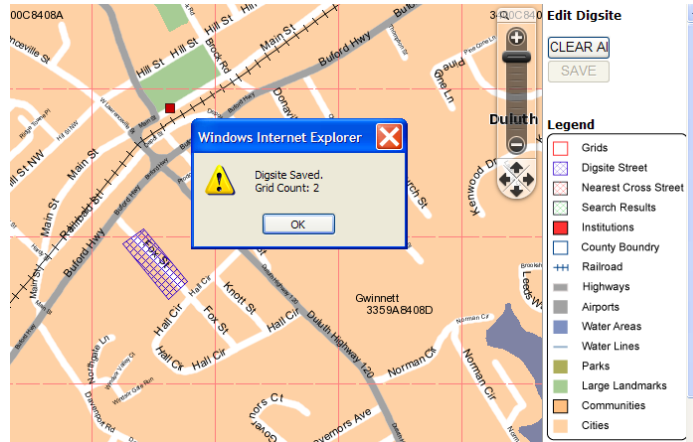

Draw Manual Polygon Digsite

1. Select the **Draw Manual Polygon Digsite** tool to draw the dig site freehand. Click on the map to begin where you want to draw and continue to click to outline the dig site.
2. Press the CTRL key on the keyboard and left click the mouse at the same time to stop drawing. The outlined area turns to blue hash marks.
3. Click on the **Save** button to the right of the map above the **Legend**.
4. A **Digsite Saved** message window with a grid count is displayed to confirm the manually drawn dig site has been saved.
5. Click on **OK** in the message window to continue.

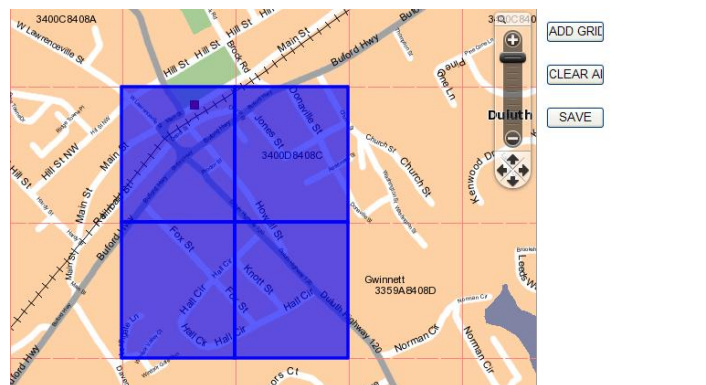

Mapping Tools Cont.

- The dig site can be cleared by clicking on the **Clear All** button to the right of the map before or after it has been saved. A dig site can be overridden by simply re-drawing and saving the dig site.

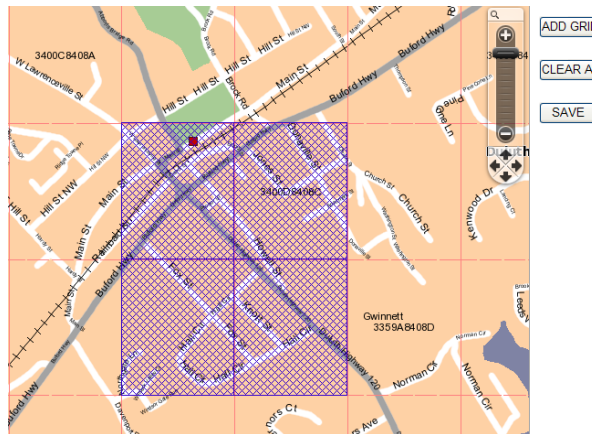

Create a Digsite Using Grid Selection

- Select the **Create a Digsite Using Grid Selection** tool to choose grids for your dig site. Click on the grid that includes your dig site. To choose more than one grid, hold down the SHIFT key on the keyboard and click on the additional grids. The selected grid(s) will be highlighted in dark blue.

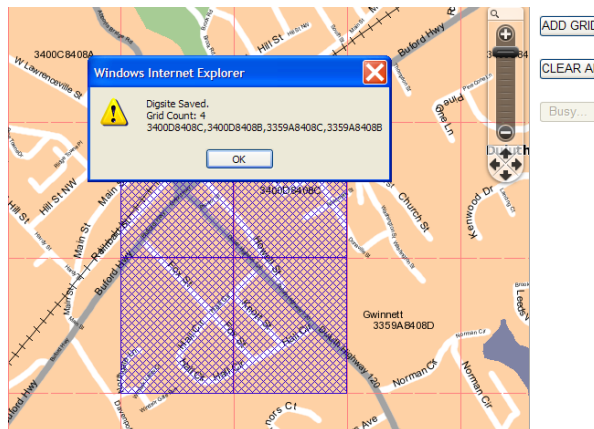

- After selecting the grid(s), click on the **Add Grid** button to the right of the map. The dark blue turns to blue hash marks.

Mapping Tools Cont.

3. Save the dig site by clicking on the **Save** button to the right of the map. A **Digsite Saved** message window with a grid count is displayed to confirm the dig site has been saved.
4. Click on **OK** in the message window to continue.

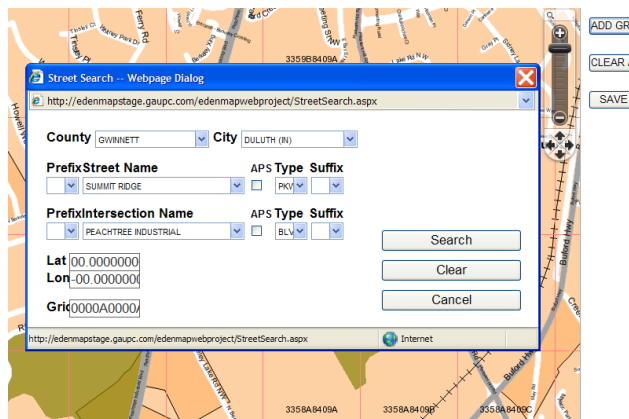

5. The dig site grid can be cleared by clicking on the **Clear All** button to the right of the map before or after it has been saved. A dig site grid can be overridden by simply re-gridding, adding the grid(s) and saving the dig site.

Search Map

1. Select the **Search Map** tool to search the map for dig site information other than the dig site information on the locate request. A Street Search window opens to allow entry of the search information. You can search the map by County, City, Street, Intersection, Lat/Lon and Grid. To close the **Street Search** window, click on the **Cancel** button.

Mapping Tools Cont.

2. A county and city must be entered in order to search by **Street Name** or **Intersection Name**.
3. If the street name or intersection is not found in the dropdown list, click in the **APS (Adjacent Places Search)** box to activate a search in the surrounding counties and cities. The cursor will automatically go back to the previous field. Enter the street name again and select the desired street name or intersection name from the dropdown list. The street must be selected from the dropdown list in order to be indicated on the map. Click on the **Search** button and the search results will be highlighted in green on the map. This is only a reference point on the map and the dig site must still be manually gridded.

4. Search by Lat/Lon or Grid if the dig site will most likely not be found on the map. This takes the map to the general area so the dig site can be manually selected. The Lat/Lon location will be highlighted in green on the map. The Grid will not be highlighted on the map, but the map does center on the Grid. Even though the dig site can be found on the map by Lat/Lon or Grid, a dig site street and nearest cross street must still be entered on the locate request. The area highlighted in green is only a reference point on the map and the dig site must still be manually gridded.

Mapping Tools Cont.

Get Info

1. Select the **Get Info** tool and click on the map to identify points on the map, i.e. county, city, streets, lakes, rivers, schools, hospitals, parks, airports and large landmarks.

Map Help

1. Select the **Map Help** tool to get a brief description of all the mapping tools.

Manually Mapping Locate Requests

There are certain situations when you will be required to manually map the dig site:

1. In the instance that you did not select the location from the drop down list in the **Digsite Address Street Name** field.
2. In the instance that the street you entered cannot be found in the database, i.e. a street in a new subdivision, then continue to enter it into the **Digsite Address** section found on the **Locate Request Creation** screen, and complete all fields required for your locate request.

You may manually map the dig site by either drawing the dig site or by selecting grids.

Drawing the Dig Site

1. Select the **Draw Manual Polygon Digsite** tool located along the toolbar to draw the dig site freehand.

2. Click on the map to begin where you want to draw and continue to click to outline the dig site.
3. Press the CTRL key on the keyboard and left click with your mouse at the same time to stop drawing. The outlined area turns to blue hash marks.

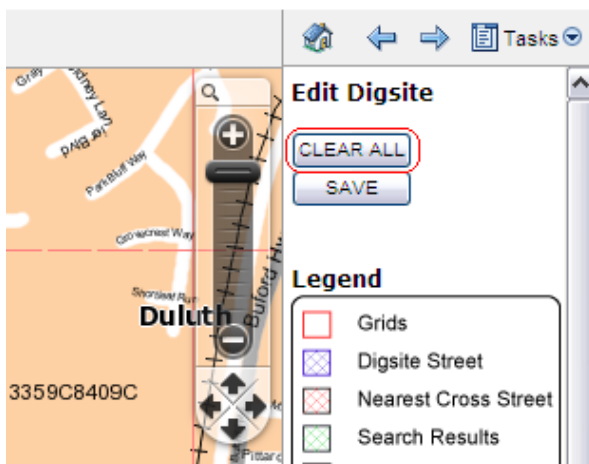

Manually Mapping Locate Requests Cont.

4. Click on the **Save** button to the right of the map above the **Legend**.

5. A **Digsite Saved** message window with a grid count is displayed to confirm the manually drawn dig site has been saved.
6. Click on **OK** in the message window to continue.

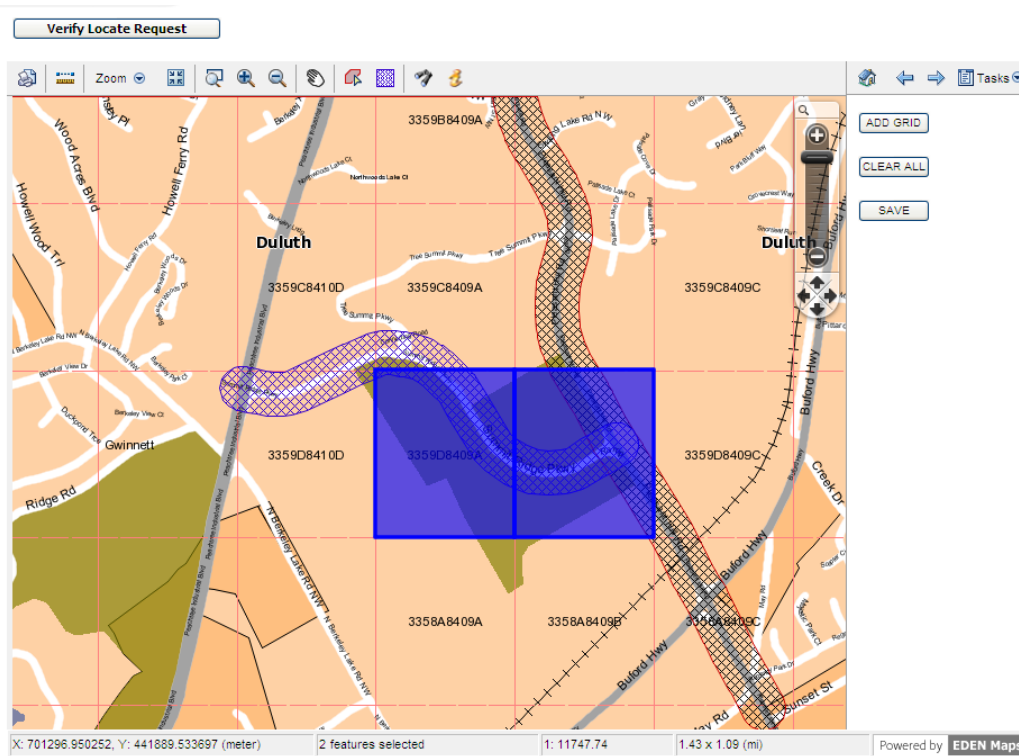

7. If you need to clear the dig site, select **Clear All**.
8. Select the **Verify Locate Request** button located above or below the map to return to the **Locate Request Creation** screen.

Manually Mapping Locate Requests Cont.

Selecting Grids

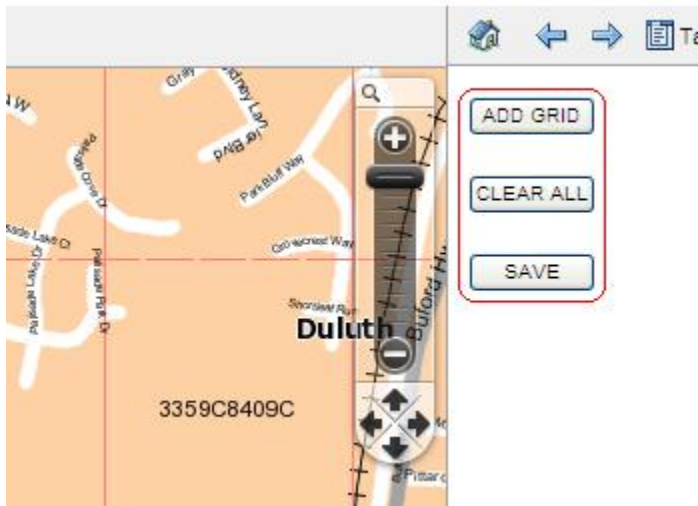

1. Select the **Grid Selection Tool** located along the tool bar to select grids.
2. The map contains red dashes in the shape of squares. These squares are known as grids and are approximately $\frac{1}{4}$ mile horizontally and $\frac{1}{3}$ mile vertically in distance per grid.

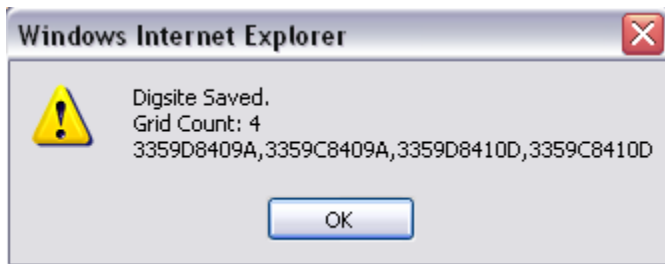

3. Determine which grid you would like to select and left click with your mouse on the grid. To select more than one grid hold down the SHIFT key on the keyboard while selecting the grids. The selected grids will change to a dark blue color.

Manually Mapping Locate Requests Cont.

4. To add your selected grid(s) select **Add Grid** located at the top right hand corner of your map. The selected grid(s) will turn to blue hash marks.
5. After adding your grid(s) select **Save** to save your dig site. Remember no locate request should require more than 8 grids.

6. After selecting **Save** a dialogue box will appear indicating that your dig site has been saved, the number of grids affected and the UPC grid numbers.
7. Click **OK**.
8. If you need to clear the dig site, select **Clear All**.
9. Select **Verify Locate Request** button locate above or below the map to return to the **Locate Request Creation** screen.

 [?]

At this point you can do any of the following actions:

- Edit any information on the locate request if needed.
- Edit the map if needed. To do so, select the **Verify Dig Site Map** button located at the bottom of the screen. You may also edit the map by selecting the **View Dig Site Map** button located to the right of the **Dig Site City** field. Correctly manually map the dig site, then select **Verify Locate Request** to return to the **Locate Request Creation** page. Submit the locate request by selecting **Submit Request** to receive your **Ticket Number**.
- Submit request. In the case where all information is correct and you are ready to submit the locate request, select the **Submit Request** button to receive your **Ticket Number**.

Receiving Your Ticket Number

After selecting *Submit Request* a dialogue box will appear with your ticket number and the following options:

- Print the locate request.
- Email a copy of the locate request.
- Fax a copy of the locate request.
- Do you need to enter another ticket?—Select **Yes** to create another locate request and you will be directed to the **Locate Request Creation** screen. By placing a check in the **Save Manually Selected Dig Site?** box, EDEN will save the map grid(s) for you to use on the next locate request. Selecting **No** takes you directly to **Locate Request Manager**.

NOTE: Do NOT select the X at the top right hand corner of the dialogue box. Doing so will direct you to the **Locate Request Creation** screen to create another locate request. However, when you submit the new locate request it will give you a different version of the same ticket you created previously.

NOTE: Please make note of your ticket number.

Creating an Intersection Locate Request

Intersection: A locate request for a specific intersection. An intersection locate request begins at the center point of the requested intersection and will be located a maximum of 200 feet in all directions in the right of way. Indicate the footage needed for your locate request not to exceed 200 feet in all directions.

					2nd County: NONE
					2nd City: NONE

Subdivision/Community:

Locate Instructions: Locate Summit Ridge Pkwy from Pleasant Hill Rd to Peachtree Industrial Blvd on both sides of the road.

1. On the **Locate Request Creation** screen select the radio button for an **Intersection to Intersection** locate request.
2. Enter county and city information.
3. Enter the street name of the dig site in the **Dig Site Address** section.
4. Enter the street name that is the beginning point of your dig site in the **1st Intersecting Street** section.
5. Enter the Street Name that is the ending point of your dig site in the **2nd Intersecting Street** section.
6. In the **Locate Instructions** field, describe the area you need located. A single locate request is allotted a maximum of one mile, on one street, as long as you do not cross into another county.

Example of an intersection to intersection dig site on the map:

Creating an Intersection to Intersection Locate Request Cont.

Some second intersecting streets will not show up in the **Street Name** drop down list because they are located in a different county and/or city than the first intersecting street.

	Street #	Prefix	Street Name	APS	Street Type	Suffix		
Digsite Address:	[?]	[?]	[?]	[?]	[?]	[?]	[?]	[?]

Since a single locate request cannot cross county lines you will need to adjust your locate instructions or create separate requests for each county.

NOTE: Do NOT submit a locate request that crosses county lines.

Design Locate Requests

Design locate requests do NOT involve any digging. Once you select **Design Notice** in the **Locate Request Type** field, you will be prompted to either select **Yes** or **No** depending on if you will be digging. Carefully read the next paragraph and select the **Proceed** button if you clearly understand it.

This is a Design locate request. Will any digging be involved? If you select "yes" you will be redirected to create a normal locate request.

Yes: No:

Please be aware that no digging is permitted on a Design locate request. Facility operators have 10 working days to either respond by marking the utilities, provide a "best available description" of any facilities in the area of proposed excavation, or allow an authorized person to inspect or copy the drawings or other records within the proposed area.

You will complete the locate request just as you would a *Normal Notice*, to include the following:

1. Add your fax number and/or email address under your company information.
2. Since no digging will be involved select "None" for the **Boring** field, "No" for the **Blasting** field, and "Underground" for the **Underground/Overhead** field.
3. The Legal Date, Restake Date, Expiration Date and Response Due Date do not apply on a design locate request. The facility operators have 10 workings days to respond to the request.

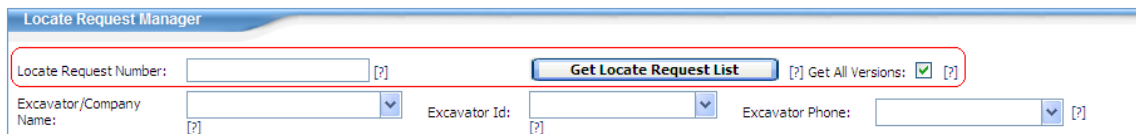

NOTE: The utility members must respond to the Positive Response Information System on a design locate request.

Locate Request Manager

The **Locate Request Manager** allows you to search for locate requests. Depending on your profile access, you may search to copy, cancel, restake, additional request, view request, print and view child locate requests.

1. Select **View Request** under the **Options** column next to the latest version of the ticket.

2. Select the **Restake** radio button.

Locate Request Manager Cont.

3. Make sure you are restaking the correct ticket by verifying the county and city, locate address, nearest cross street, and locate instructions.
4. Add remarks or remove remarks that do not apply in the **Other Remarks** field.
5. If overhead protection is on the ticket, update the **Overhead Begin Date** and **Overhead Completion Date**.
6. Select **View Dig Site Map** or **Verify Dig Site Map** to check the map.
7. Click on **Verify Locate Request** to return to the creation screen.
8. Click the **Restake** button located at the top of the page.
9. Make note of your ticket number.

Restake Before the Restake Date

1. Once you select to restake the ticket you searched for, a dialogue box will appear informing you that it is too soon to restake the ticket.
2. You must wait until the restake date to restake the ticket.
3. To view the restake date, click on **OK**. The restake date will be at the bottom of the screen.

Restake Past the Restake Date

1. Once you select to restake the ticket you searched for, a dialogue box will appear prompting you to create a new ticket by copying the ticket. (Refer to Page 39 of this manual for Copy procedures.)
2. Remove old restake ticket numbers and any remarks that are no longer applicable from the **Other Remarks** field.

Locate Request Manager Cont.

Restake an Expired Ticket

A ticket can be restaked even though it has expired. Treat these tickets the same as when the restake date has passed.

1. Copy the ticket. (Refer to Page 39 of this manual for Copy procedures.)
2. Remove old restake ticket numbers and any remarks that are no longer applicable from the **Other Remarks** field.

Additional Request

An Additional Request is done to re-notify the utility members to mark the area on an existing ticket. The system will assign a new version for the same ticket. A combination 2nd and 3rd request can be done on the same version of a ticket. Additional Requests do not extend the life of a ticket.

A 2nd Request cannot be issued if you see markings on site and you believe they are incorrect and PRIS shows no response. These may be old markings. You must wait for the response to be loaded in PRIS.

#	Locate Request Number	Version	Excavator	Street Number	Street Name	City	County	Type	Status	Options
1	09088-500-002	1	UPC	777	Abbotts Pointe	DULUTH	GWINNETT	Normal Notice	Complete	Copy Cancel Restake Request Print Child Additional Request Retransmit View

1. Select **Additional Request** in the **Options** column next to the latest version of the ticket.
 - You cannot issue an Additional Request on an expired ticket. A new ticket (Restake) must be issued.
 - If the ticket you are Additional Requesting is about to expire, you may want to restake the ticket. Do the Additional Request first, then do the Restake ticket.

Service Areas Manage Responses		View Response History		
<u>Service Area</u>	<u>Current Response</u>	<u>Contact Name</u>	<u>Contact Type</u>	<u>Phone</u>
<input checked="" type="checkbox"/> CBL01 CHARTER COMMUNICATIONS - GWINNETT	0 No Response	JIMMY PRICE	Receiving Location	7708067060
<input type="checkbox"/> XOC90 X O COMMUNICATIONS	0 No Response	BARRY LONG	Receiving Location	6784444400

2. Check the service area box next to the utility member(s) that need(s) to be re-notified.

NOTE: Not all utilities are members of our service. Therefore, we must be certain that the utility company in question is a member. Otherwise, you will need to contact that utility company directly.

NOTE: Remove any information from the **Driving Instructions** and **Other Remarks** sections of the request that no longer apply. (Keep the Restake information.)

3. Type the reason the utility member(s) need(s) to be re-notified in the **Other Remarks** box on the ticket. (For instance, the markings have washed away, disputing the Positive Response Information System code, etc.)

Example: 2nd Request to AGL114 – Disputing Positive Response code 1 – Gas lines are not marked – Please mark ASAP.

Locate Request Manager Cont.

NOTE: Keep in mind that the utility lines are marked from the street to the meter only. If the lines were not marked beyond the meter, the lines beyond the meter are considered private facilities and you may need to get in touch with a private locator. You may search for private locators in the Yellow Pages under “utilities”.

- If the crew is on site and you have a contact person, type this information in the **Other Remarks** section including the contact person’s phone number.

- Select **Make Additional Request** button.
- Your ticket number, dates, and times stay the same.

Reasons to Issue a 2nd Request

- Markings have been graded over
- Rain has washed the markings away
- Dispute a response from the Positive Response Information System even if the legal date and time are not up yet

Reasons to Issue a 3rd Request

- Response period has expired (12 noon on the legal date) and the utility member has not responded to the Positive Response Information System
- A 2nd Request has been made and there is no response or the web user disagrees with the PRIS

2. A new window will appear with a text version of the ticket.
3. Select **Print** button located along the top margin.

Positive Response Information System

The Positive Response Information System (PRIS) is designed to assist communication between excavators and the utility facility operators. Once a locate request has been made by an excavator, the facility operator will receive a copy of the request and will respond within a specified time frame if they have facilities in the area. The facility operator will then report to the Positive Response Information System that their lines are either marked, marked with exceptions, or unmarked (including the reason). An excavator may then access this information by calling (866) 461-7271 or on the Internet at <http://eden.gaupc.com> or www.gaupc.com to clarify the status of the markings.

Members must respond to PRIS on Normal, Insufficient, Additional Request, Restake, and Design tickets. They are not required to respond on Emergency, Damage, and Overhead tickets.

Any person performing excavation is responsible for being aware of all information timely entered into the Positive Response Information System prior to the commencement of excavation.

Positive Response Codes

Marked

- 1A Marked.
- 1B Marked: High profile utility in conflict.
- 1C Marked: Permanent marker present.
- 1D Marked: Ticket should have been white-lined but was not.

Marked with Exceptions

- 2B Marked with conditions: Privately owned facilities on property. Excavator needs to contact the private facility owner to determine how facilities will be located. If someone is needed to locate private utility lines, locators' listings may be found in the Yellow Pages under Utilities.

Unmarked

- 3A Unmarked: Locate technician could not gain access to complete the request. Locator will contact excavator.
- 3B Unmarked: Incorrect address information; contact UPC to obtain a new ticket.
- 3C Unmarked: Locate technician and contractor have agreed to meet on site on a specific date.
- 3H Unmarked: Privately owned facilities on property. Excavator needs to contact the private facility owner to determine how facilities will be located. If someone is needed to locate private utility lines, locators' listings may be found in the Yellow Pages under Utilities.
- 3I Unmarked: Marking instructions unclear. Locator will contact excavator.
- 3J Unmarked: Extraordinary circumstances exist; contact the utility owner/operator directly for details.
- 3K Unmarked: Not service provider for this location. Served by another provider.
- 3M Unmarked: Late, weather conditions—Contact utility owner/operator for further information.
- 3N Unmarked: Late.

Positive Response Information System Cont.

- 3Z Unmarked: On-going job, locate technician and contractor have established a written agreement on scheduled marking.

Clear

- 4A Clear: No facilities.
4B Clear: 100% overhead facilities.

No Conflict

- 5 No conflict, utility is outside of requested work site.

No Locate Required

- 6 Excavator is contractor for facility owner. Locate required prior to excavation per contractual agreement.

Refuse to Locate

- 7 Facility owner/operator refuses to locate. This is a violation of the statute.

Sewer Facilities

- 8A Sewer facilities and sewer laterals marked.
8B Sewer facilities marked and sewer laterals marked with exception—Permanent marker present.
8C Sewer facilities marked and sewer laterals marked as un-locatable with green triangle pointing to address or addresses in question.
8D Sewer facilities marked and sewer laterals unmarked: Sewer facility owner/operator has transmitted or mailed a copy of their best available sewer lateral records to the excavator.
8E Sewer facilities marked and sewer laterals unmarked—This utility member is a local government that receives less than 50 requests per year. Please contact this sewer operator directly for further instructions concerning the sewer laterals.
8F Sewer facilities have been marked and portions of sewer laterals present have been marked with or without exception and/or with green triangles. Portions are unmarked. Sewer facility owner operator will contact the excavator concerning unmarked portions in accordance with 8D or 8G.
8G Sewer facilities marked and sewer laterals unmarked. Sewer facility owner/operator has scheduled an onsite meeting with the excavator.

Design Notifications

- 9A Design locates: Marked.
9B Design locates: Marked with exceptions—Permanent marker present.
9C Design locates: Unmarked: Contact facility owner/operator for copy of drawings or other records.
9D Design locates: Clear, no facilities.

Positive Response Information System Cont.

Large Project Notifications

- 10A Large projects: Meeting date/time accepted.
- 10B Large projects: Meeting date/time rejected.
- 10C Large projects: Agree to treat as a large project.
- 10D Large projects: Disagree to treat as a large project.
- 10E Large projects: Will not attend meeting—Not service provider for this location.
- 10F Large projects: Will not attend meeting—Clear, no facilities.
- 10G Large projects: Not service provider for this location.
- 10H Large projects: Clear, no facilities.

Positive Response Manager

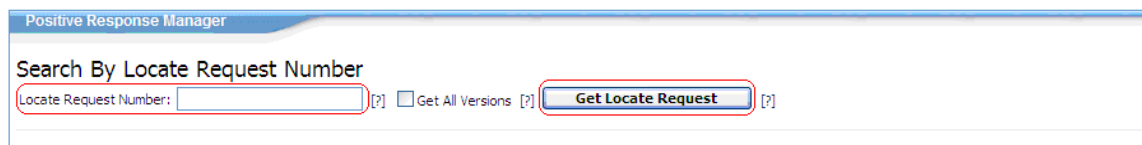

The Positive Response Information System or (PRIS) is an automated system serving two functions. It allows the UPC utility member to respond to each individual locate request providing information on whether underground facilities are present or not present. It also allows the member excavator to check the responses to their locate requests.

Positive Response Manager is mainly for UPC utility members to search for locate requests that need to be responded to. They can either search by locate request number or by their service area and date.

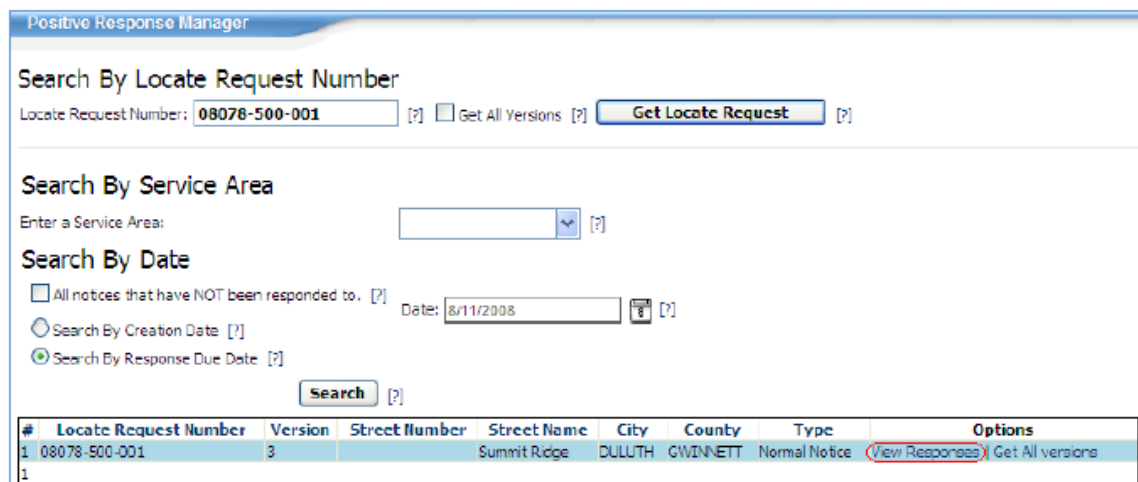

Search by Locate Request Number

1. Select **Positive Response Manager** from the top panel.

2. Type in the ticket number you are checking on including dashes. (Example: 08078-500-001)
3. You may place a check in the **Get All Versions** box to search for all the versions of the ticket.
4. Select **Get Locate Request**.
