

Dear Underground Facility Owner/Operator,

Georgia 811 is a nonprofit corporation dedicated to preventing damage to Georgia's underground utilities and promoting public safety. We function as a communication system, connecting our member utility companies with professional excavators and homeowners who are planning mechanized digging activity such as excavation, tunneling, grading, boring and demolition.

This notification system provides Georgia 811 members an opportunity to locate and identify any underground facilities they may have in an area where digging is planned.

As provided by State Law we are governed by a Board of Directors comprised of representatives of all utility groups in Georgia. We receive no tax dollars and are therefore supported completely, as specified by law, by our members. Membership cost is based on an annual fee of \$200.00 plus whatever the percentage of your use of the system. Special pricing is available for our smallest members.

We encourage you to join with our 800 plus members in helping to reduce utility damages and prevent personal injuries. For more information, call Customer Connections at 770-623-5786 or by email at CustomerConnections@Georgia811.com.

Sincerely,

Meghan Rafinski
President and CEO
